Responsible Boating

Arthurs Lake is exposed to extreme changes in weather and can become very rough. Hazardous conditions can occur at any time of the year with little warning. During periods of low water Arthurs Lake may be extremely shallow with many submerged navigation hazards.

Observe the 5-knot speed limit north of the transmission lines across Cowpaddock Bay and the no boating zones within 30 metres of the Arthurs Lake Dam and the Pump House.

Practice minimal impact boating by accelerating gently in shallow water to avoid the underwater wash from the propeller jet stirring up silt and mud. This sediment clouds the water, disturbs sensitive weed beds, smother aquatic plants and degrades fish habitat.

Remember

- Check your wash - if it's white it's all right - if it's brown slow down.
- Fishing from a boat within 100 metres of an angler fishing from the shore is prohibited unless the boat is securely moored.
- Do not park on or obstruct boat ramps.

Lake Levels

Information on current lake levels for Arthurs Lake including Metres from full and trend (Rising, falling, steady) is available from www.ifs.tas.gov.au / Going Fishing / Things to check / Lake Levels.

- Report any unusual fish captures or algal sightings immediately to the Inland Fisheries Service
- Report illegal activities to; Bushwatch 1800 333 000
