www.ifs.tas.gov.au

Director's Message

As Acting Director of the Inland Fisheries Service (IFS), I am pleased to introduce the *2024-25 Tasmanian Inland Fishing Code*. This Code is your essential guide to the regulations covering our inland recreational fishery and is essential reading for all freshwater anglers.

Firstly, thank you for buying a freshwater angling licence for the 2024-25 fishing season. Funds generated from the sale of licences go directly into managing our unique, world class inland fishery. Licence fees contribute to programs managed by the IFS which include stocking of inland waters, creating, improving and maintaining access to the fishery, compliance related activities, undertaking various research programs, fishery stock assessments, threatened species monitoring, and pest fish management activities. We couldn't do this important work without your ongoing support, so thank you!

Last season was a challenging one for our fishery with dry conditions impacting on many waterways around the state. Fortunately, the fishery has benefitted from previous years of favourable environmental conditions resulting in ideal conditions for fish spawning. With the prospect of winter rains providing a much needed recharge of our inland waterways, we remain optimistic about the season ahead and with nearly all Tasmanian lakes and rivers holding trout, the fishing possibilities around Tasmania are almost endless.

Hopefully by now you have downloaded the Infish App 2.0. The App provides useful information on over 200 inland waters to help you plan your next fishing adventure. The App now includes an Angler Diary feature that allows you to record the time and

place you fished, the methods used, the size and number of fish caught, the weather conditions and photos of your catch. Creating and maintaining your angler diary will help you to identify fishing trends and patterns to improve your catch, and the data will assist the IFS by providing real-time information on fishing effort and catch rates to assist with the ongoing management of your fishery. You can also use the App to stay up to date on the latest IFS news and fish stocking. To download the App, use the QR code on page 43 of the *Tasmanian Inland Fishing Code* or visit www.ifs.tas.gov.au/infish

Finally, from a personal perspective, I am excited about taking on the role of Director in an acting capacity over the coming season. As a keen trout fisher myself, I am looking forward to the prospect of working with the IFS team and anglers to make a positive contribution to the ongoing management of our amazing fishery.

Enjoy the season!

Ryan Wilkinson

Acting Director – Inland Fisheries Service

Disclaimer

This fishing code is not a comprehensive account or precise statement of the law. The legislation covering inland fisheries is contained within the *Inland Fisheries Act 1995* and subordinate legislation, which can be accessed at www.legislation.tas.gov.au

We make every attempt to ensure the accuracy and reliability of information published in this fishing code, but it should not be relied on as a substitute for formal advice from the originating bodies or Departments.

The Inland Fisheries Service, its employees and other agents of the Crown will not be responsible for any loss, however arising, from the use of, or reliance on this information. The *Tasmanian Inland Fishing Code* is printed and published electronically on the IFS website at www.ifs.tas.gov.au

Important dates

Saturday 3/8/24	Opening of most waters
Saturday 28/9/24	Opening of designated rainbow trout waters
Sunday 13/10/24	Gone Fishing Day
Saturday 30/11/24	Opening of Canal Bay, yingina / Great Lake
Sunday 30/3/25	Closure of Canal Bay, yingina / Great Lake
Sunday 27/4/25	Closure of most waters
Sat 17 and Sun 18/5/25	Trout Weekend, Liawenee
Sunday 1/6/25	Closure of <ul style="list-style-type: none">• designated rainbow trout waters.• extended season waters of;<ul style="list-style-type: none">• lakes Mackintosh and Rosebery; and• the lower section of Brumbys Creek, Tinamirakuna / Macquarie, Meander and South Esk rivers.

Regulation changes

There are no changes to regulations for the 2024-25 season.

Report illegal fishing

If you suspect or see illegal fishing, report it to 1300 463 474 or 0438 338 530, Manager (Compliance) as soon as possible. Let us know:

- the location, date and time of activity;
- description of activity and people involved;
- car/boat registrations; and
- equipment being used.

You may remain anonymous and all information is confidential.

Licence information

When and where you need an angling licence

Each person must have a current angling licence to fish inland waters in Tasmania. This includes farm dams on private property. Most inland waters have an angling (or 'open') season. You can only fish that water during the open season that applies to it. Open season dates are on page 8 and 22-36 of this fishing code. You do not need an angling licence to fish:

- at a registered private fishery.
- for native fish including bream in the specified (indigenous fish) waters listed in the *Inland Fisheries Regulations 2019*.
- with a single rod at an open inland water if the person is under 14 years old.

You must have a separate licence for whitebait fishing.

No fee for junior angling licences

The Tasmanian Government is continuing to make junior angling licences free this season. Children from 14, up to and including, 17 years of age can fish Tasmania's inland lakes and waterways with a free angling licence available online and through agents.

Anglers under 14 years of age do not require an angling licence.

Young Adult Angling Licence Promotion * NEW

The Inland Fisheries Service is undertaking a major promotion to make it easier for junior anglers to transition into an adult licence. We have created a Young Adult Angler licence for those aged between 18 and 21 with a reduced fee.

For more information and full terms and conditions go to www.ifs.tas.gov.au

Licence type and cost

Page 12 shows the angling licence types and costs for the 2024-25 licence period, which runs from 1/8/24 to 31/7/25.

Full-season adult angling licences are discounted for:

- Services Australia or Department of Veterans' Affairs (DVA) Pensioner Concession Card holders.
- Seniors Card holders – issued by states and territories.
- Young Adults aged between 18-21 at time of purchase.

You must show your Seniors Card or Pensioner Concession Card when you buy your licence.

Please note that a Health Care Card does not qualify a person as eligible for a Pensioner licence.

Buying or renewing an angling licence

You can buy or renew an angling licence online at www.ifs.tas.gov.au

Licences are also available at all Service Tasmania shops, on board the Spirit of Tasmania ships and many tackle, outdoor and sports stores throughout Tasmania.

Angling licence conditions

When you go fishing, you must comply with the *Inland Fisheries Act 1995*, *Inland Fisheries Regulations 2019*, and subsequent Orders.

We summarise these rules and regulations in this Tasmanian Inland Fishing Code. You can view complete versions of the legislation at www.legislation.tas.gov.au

Angling licence type	Cost \$
One Adult - full season	91.50
One Young Adult (18-21 yrs) - full season	50.00
One Senior - full season	72.50
One Pensioner – full season	50.00
One Junior (14-17 yrs) - full season	No fee
One Person 48 hours	28.00
One Person 7 days	46.50
One Person 28 days	72.50
Same Person 2nd Rod Upgrade - Adult	18.50
Same Person 2nd Rod Upgrade - Senior, Pensioner, Young Adult, 28 Day, & 7 Day	9.00
Same Person 2nd Rod Upgrade – Junior	No fee
5 Season Licence - One Adult 1 Rod	457.50
5 Season Licence - One Senior 1 Rod	362.50
5 Season Licence - One Pensioner 1 Rod	250.00
Same Person 5 Season 2nd Rod Upgrade - Adult	92.50
Same Person 5 Season 2nd Rod Upgrade - Pensioner & Senior	45.00
Replacement Licence	3.50

Recreational species

The recreational fishing regulations focus on the following species:

- Salmonids (introduced)
 - brown trout (*Salmo trutta*)
 - rainbow trout (*Oncorhynchus mykiss*)
 - brook trout (*Salvelinus fontinalis*)
 - Atlantic salmon (*Salmo salar*)
- Native (indigenous)
 - black bream (*Acanthopagrus butcheri*)
 - river blackfish (*Gadopsis marmoratus*)
 - short finned eel (*Anguilla australis*)
 - long finned eel (*Anguilla reinhardtii*)

Separate regulations apply to the recreational whitebait fishery, which covers several species of small native fish.

Whitebait fishing licence

The run of whitebait occurs throughout the State between spring and early summer. The runs consist of several species of small transparent fish migrating from the sea into rivers and streams.

To fish for whitebait you need a separate whitebait licence.

Whitebait licences are available online at www.ifs.tas.gov.au and from Service Tasmania shops, on board the Spirit of Tasmania ships and many tackle, outdoor and sports stores throughout Tasmania.

In 2024, the Duck River (except 50 metres above and below the weir), Great Forester River, Henty River, Huon River, Inglis

River, Mersey River, Montagu River, Pieman River, River Derwent, River Forth, kanamaluka / River Tamar including Trevallyn Tailrace and the Rubicon River (except 50 metres above and below the weir) are open to whitebait fishing from 1 October 2024 to 1 November 2024.

All other waters are closed to whitebait fishing. Significant penalties apply for fishing in closed waters.

There is a daily catch limit of 2 kg and total catch limit of 10 kg for the season.

Whitebait nets cannot have a circumference of greater than 120 cm and must not be used in conjunction with any devices or structures capable of diverting fish into the net or stopping their escape. 'Structures' include rocks, logs, or branches placed in the river to influence the movement of fish.

It is an offence to sell or buy whitebait. It is an offence to possess whitebait without a whitebait licence.

A whitebait licence costs \$37.00.

Rules and regulations

Angling rules and regulations, including seasons, dates and times, bag and size limits, and angling methods apply to all Tasmanian inland waters. These can change from water to water.

We summarise these rules and regulations in this Tasmanian Inland Fishing Code. You can view complete versions of the legislation at www.legislation.tas.gov.au

A database of inland waters and their regulations is available at www.ifs.tas.gov.au or by downloading the Infish App 2.0.

Bag and size limits

The bag limit is the number of fish you can keep at a water in any one day. The size limit is how big, or small, the fish must be for you to be allowed to keep it.

Any fish in your possession at a water counts towards the limit for that water.

Bag limits for salmonids

- Atlantic salmon: a daily bag limit of five (5) fish.
- Brook trout: a daily bag limit of two (2) fish.
- Brown and rainbow trout: the daily bag limit can change from water to water; see pages 22-36.

Bag and size limits for native fish in inland waters

- Black bream: a daily bag limit of 10 fish with a minimum length of 250 mm.
- Eels: a daily bag limit of 12 fish and a possession limit of 24 fish with a minimum length of 300 mm.
- River blackfish: a daily bag limit of 12 fish with a minimum length of 220 mm.
- Estuary perch: PROTECTED. Any estuary perch caught must be released immediately. Penalties apply for taking protected fish.

Bag and size limits for pest fish in inland waters

- Redfin perch and tench: there are no bag, possession, or size limits.

Measuring fish

Measure fish, other than black bream, from the tip of the snout to the fork of the tail.

Measure black bream from the tip of the snout to the end of the tail.

You should measure fish as soon as you catch them and immediately return them to the water if undersized or exceeding the upper size limit.

Closed waters

Waters always closed to fishing include:

- Waters in which fish are maintained by the Director or by any other person or body with the consent of the Director for the purposes of fish culture or public display.
- Waters within 100 metres of a fish trap maintained by the Director.

All other waters closed to fishing can be found in the River and Lake Fishery Exceptions table on pages 27-36.

Waters reserved for anglers with a disability

Risdon Brook Reservoir is reserved for anglers with eligible disabilities for the purpose of the Transport Access Scheme.

Junior Angling Development Fisheries

Junior Angling Development Fisheries are waters reserved for junior anglers.

Only people under 18 can fish at Junior Angling Development Fisheries.

The following rules apply:

- a daily bag limit of two (2) fish
- a minimum size limit of 300 mm
- only one (1) fish over 500 mm
- open to all fishing methods
- a season of 3/8/24 - 27/4/25

The list of waters regulated as Junior Angling Development waters can be found in the River and Lake Exceptions table (pages 27-36).

Inland waters and seaward limits

The 'seaward limit' is the boundary between marine and inland waters. The Inland Fisheries Service has jurisdiction over fish and fisheries in all inland waters in Tasmania. This means all waters on the inland side of the seaward limit. Seaward limits are defined in the *Inland Fisheries Act 1995*.

Some of the common seaward limits are:

- Arthur River - The mouth of that river at grid reference 303452E 5452424N.
- Great Forester River – the point where that river enters Anderson Bay delineated by a straight line between grid references 537659E 5461043N and 537000E 5460780N.
- Huon River – delineated by a straight line between grid references 498484E 5224284N and 500623E 5224284N next to the southern extremity of Castle Forbes Bay.

- River Leven – the downstream side of the bridge carrying the National Hwy 1 across that river at grid reference 428952E 5442853N.
- Mersey River – a straight line across that river between grid references 448089E 5435279N and 448507E 5436286N (intersection of the B19 Road and Tarleton Road on the western shore to the boat ramp on the eastern shore).
- Scamander River – the downstream side of the bridge carrying the A3 road across that river at grid reference 605469E 5409338N.
- Swan River – delineated by a straight line between grid references 592571E 5341270N and 592532E 5341134N, near where it enters King Bay.
- kanamaluka / River Tamar – a straight line across that river between grid references 508939E 5416893N and 509631E 5416893N (extending from Haystack Point).
- River Derwent – a straight line across that river between grid references 523162E 5262466N and 523944E 5262466N (extending from the eastern extremity of Dogsheer Point).

Please note that an 'excepted waters' boundary extends across the River Derwent from Dowsings Point to Store Point. Although this excepted water is defined as a marine water, you must have an inland fisheries licence to take trout upstream of this boundary.

Rods and lines

Legal angling methods are fishing with a rod, reel and line using either bait, artificial lure or fly.

There are inland waters where only one or two of the legal angling methods are allowed. Please see the River and Lake Fishery Exceptions table on pages 27-36.

Only one rod and line is allowed per person – unless that person is licensed to fish with two rods at the same time (except for lakes Mackenzie and Augusta, which are restricted to one handheld rod and line when bait fishing).

Anyone may use two rods at the same time fishing for indigenous fish (including bream) in the specified indigenous fish waters listed in the *Inland Fisheries Regulations 2019*.

A single line must have no more than:

- two lures; or
- one lure and one bait; or
- two baits; or
- three artificial flies.

You must always be within eight metres of your set rod and able to see it.

It is illegal to look after another person's rod and line at any time, even if you have a current licence.

Use of a landing net

You may use a landing net to land a fish hooked on a rod and line.

The landing net must have:

- a handle length of less than two metres.
- an opening of not more than one metre in diameter.

Bait fishing

Bait fishing includes natural, artificial or manufactured baits (for example 'Powerbait') or similar.

It is an offence to use or possess bait in waters reserved for; artificial lure or fly fishing, National Parks and the Tasmanian Wilderness World Heritage Area (TWWHA) (except lakes Mackenzie and Augusta where a single, handheld rod is allowed).

It is an offence to use frogs, freshwater crayfish or ground bait (berley) at any inland water. You may not use fish or fish products as bait in any inland waters other than those sections of rivers subject to tidal movement.

Collecting bait

You may use a seine net to catch live bait, other than whitebait, in those sections of rivers subject to tidal movement from 27/7/24 to 27/4/25.

The seine net must:

- not be more than six metres long and one metre deep
- have a mesh size between 12 and 30 mm.

Strike indicators

Only a purpose-built strike indicator can be used to warn of movement in the rod or line while set rod fishing.

Plants such as willow, a noxious weed, should not be used as a strike indicator, as it can propagate. It is an offence to use bottles, jars, cans or similar objects made of plastic, glass, aluminium or any other metal as a strike indicator.

Illegal equipment

Includes:

- Use or possession of nets other than a whitebait, seine or landing net.
- Unattended set rods or deadlines.
- Use of spears or firearms.
- Use of electrical, electronic, sonic or ultrasonic devices capable of influencing fish movement.

Illegal activities not only affect fish populations but can also affect other wildlife.

We encourage you to please report any suspected cases of illegal activity to 1300 463 474 or 0438 338 530, Manager (Compliance) as soon as possible.

River and Lake Fishery rules

River fisheries rules

- a daily bag limit of five (5) fish.
- a minimum size limit of 220 mm.
- open to all fishing methods.
- a season of 3/8/24 - 27/4/25.

Unless the water is within the TWWHA or National Park, or listed **in the table** on pages 27-36.

Lake fisheries rules

- a daily bag limit of 12 fish.
- a minimum size limit of 300 mm.
- open to all fishing methods.
- a season of 3/8/24 – 27/4/25.

Unless the water is within the TWWHA or National Park, or listed **in the table** on pages 27-36.

Examples: Arthurs Lake, Lake Echo, Laughing Jack Lagoon, Pine Tier Lagoon, Wayatinah Lagoon.

Remember:

- A daily bag limit of five (5) fish applies to Atlantic salmon.
- A daily bag limit of two (2) fish applies to brook trout.

Even if the total bag limit for the water you are fishing is 12, it can only include five (5) Atlantic salmon and two (2) brook trout.

Boating information

A boat is a motorised boat or manually propelled vessel such as a kayak, canoe, sit-on-top or float-tube.

Boating in the Tasmanian Wilderness World Heritage Area (TWWHA)

Motorised boating is only allowed on Pillans and Julian lakes, Double Lagoon, lakes Ada, Augusta, Fergus (electric only), Mackenzie, Pedder, St Clair and the Gordon River.

Fishing from a boat

The rules for fishing from a boat include the following:

- You cannot fish from a boat within 100 m of an angler wading or fishing from the shore unless the boat is securely moored.
- You may only fish from a non-motorised boat at lakes Camden, Lea and South Riana, and at Ada, Shannon and Talbots lagoons.
- You may not troll from a boat at Penstock and Little Pine lagoons.
- You may take fish from Weir No. 1 and Weir No. 3 on Brumbys Creek from a boat only propelled manually or by an electric motor.
- You may not fish from a boat in East Rocky Lagoon, Guide Reservoir, Howes Lagoon Bay, Lake Botsford, Carter Lakes, Lake Dudley, Pet Reservoir, Rocky Lagoon, and any tailrace, impoundment or tributary flowing into Weir 1 at Brumbys Creek.
- Only a boat propelled manually or by an electric motor can be used at Curries River Reservoir and Lake Mikany.
- At the request of the water manager, motorised boating is not permitted at Camden Lake, South Riana Lake, Shannon Lagoon and Talbots Lagoon.

Responsible boating

Anglers must:

- Make sure everyone in a vessel under 6 metres is wearing a life jacket whilst underway.
- Have up-to-date safety and emergency equipment.
- Obey speed limits.
- Not obstruct access to a boat ramp.

Anglers should:

- Take care, particularly in shallow water.
- Check their wash and 'if it's white, it's all right – if it's brown, slow down'.
- Use an appropriate size boat and low emission motor.
- Avoid using a drogue in shallow weedy areas.
- Check for and remove weed, mud and other debris from your boat and trailer between waters.

Boating on Penstock and Little Pine lagoons

To protect the environment, please follow these regulations and recommendations.

Penstock Lagoon:

- Stay within the 5-knot speed limit regulation.
- Petrol motors should only be used in the designated central corridor.
- Observe the non-motorised boating zone in Beginners Bay.

Little Pine Lagoon:

- Stay within the 5-knot speed limit regulation.
- Use electric motors, row, or paddle north of a line running from the northern end of Bertrams Island to the western shore of the lagoon.

Angling Safety

Fishing is not dangerous but safety around water is essential. Learn how to swim and practice wader safety. Fish with a friend and supervise junior anglers.

Check for emergency warnings.

Be prepared for the weather. Check the forecast at www.bom.gov.au or phone **1300 754 389**.

Check the lake levels and river flows by heading to;

- Hydro Tasmania at www.hydro.com.au/water
- Department of Natural Resources and Environment Tasmania at www.nre.tas.gov.au/water/water-data
- The Bureau of Meteorology at www.bom.gov.au

Inland Fisheries Officers

Fisheries Officers regularly patrol inland waters throughout Tasmania. Officers check that anglers are complying with the requirements of the *Inland Fisheries Act 1995*. They also collect important information about your catch and angling effort that helps guide fisheries management and planning.

Protecting the fishery and the environment

We all have a responsibility to help protect the natural environment and the fishery through our actions, attitude and behaviour. Please:

- Respect other anglers and freshwater users.
- When wading, avoid soft sediments, weed beds and fragile plants.
- Do not use motorcycles, 4WD or ATV vehicles in wet, boggy or sensitive ecological areas.
- Do not litter – take your rubbish with you.
- Camp in designated camping areas.

- Light fires only in permitted areas. Make sure you completely extinguish all fires.
- Do not fell trees for firewood or destroy vegetation when making camp or collecting wattle grubs.
- Dispose of fish waste responsibly.
- Use toilets where provided. Otherwise, walk 100 m away from any water body, dig a 15 cm hole and bury your waste including the toilet paper.

Native fish species

Tasmania has 25 species of native freshwater fish. Twelve of these are wholly protected under the *Threatened Species Protection Act 1995*, including the Australian grayling and 11 species of galaxiid. All species of freshwater crayfish including the giant freshwater crayfish (*Astacopsis gouldi*) are protected and fishing is prohibited. Significant penalties apply for taking threatened or protected species.

General Biosecurity Duty

The General Biosecurity Duty (GBD) was introduced in March 2021 through the *Biosecurity Act 2019*. The GBD means all Tasmanian's have 'duty of care' to take all reasonable and practical measures to prevent, eliminate, or minimise biosecurity risks. Biosecurity Tasmania has developed resources to help you understand GBD obligations. There is more information available at: www.nre.tas.gov.au/GBD

Pest fish species

Pest fish have the potential to cause significant environmental harm. Pest fish include European carp (*Cyprinus carpio*), all species of mainland yabby (*Cherax* spp.) and Eastern gambusia (*Gambusia holbrooki*). You cannot have any of these fish in your possession.

Goldfish (*Carassius auratus*), redfin perch (*Perca fluviatilis*) and tench (*Tinca tinca*) are also unwanted introduced pests and it is important to prevent any further spread of these species.

It is an offence to transport and release live fish into any inland water in Tasmania without a permit.

Keep out didymo

To help prevent the introduction of the invasive algae didymo, commonly known as rock snot, we ask anglers visiting or returning to Tasmania not to bring used fishing equipment that is damp, wet or contains water into the State.

It takes only a single cell of didymo in a drop of water to transfer this highly invasive pest. 'Check, Clean, Disinfect and Dry' anything used in freshwater.

River Derwent seafood warning

Before eating fish caught from the River Derwent Estuary, including Browns River, check

www.derwentestuary.org.au/fishing-and-seafood-safety/

North Esk River PFAS

The Department of Health advises people not to eat any fish including eels caught in the North Esk River from the Corra Linn Gorge/Bridge to the kanamaluka / River Tamar.

Accessing waters across private land

An angling licence does not provide right of access to rivers and dams in Tasmania.

If in doubt, obtain the landholder's permission and observe all safety warnings and directions.

We have negotiated foot access to some rivers and dams with private landowners.

Anglers using these formal access points should not:

- light fires,
 - climb fences,
 - shoot,
 - cut timber,
 - camp,
 - damage trees,
 - litter,
 - disturb stock,
 - be accompanied by a dog,
 - enter paddocks or trample crops,
 - leave gates other than as they find them (open or closed),
 - enter poppy crops, which are strictly enforced licensed areas.
- Anglers may only walk along the perimeter of crops.

Anglers Alliance Tasmania

Anglers Alliance Tasmania (AAT) is the peak body for freshwater anglers. AAT represent the interests of all Tasmanian and visiting licensed anglers.

Anglers should contact AAT with their thoughts and ideas.

Anglers are invited to visit the AAT website at

www.anglersalliance.org.au for more information or to view their webcams located at many popular waters.

Trout guides

The use of an experienced and accredited guide can make the difference between success and failure for the visiting or novice angler. Tasmania offers professional guiding services from one-day fly fishing lessons for beginners through to fully guided expeditions.

Trout Guides and Lodges Tasmania Inc. (TGALT) is the industry body whose members meet certified and audited accreditation standards, including the Tourism Council of Tasmania endorsement.

For further information, assistance and bookings refer to

www.troutguidestasmania.com.au

Infish App 2.0

*Take a fishing holiday at home
with everything in your pocket.*

Features

- Where to fish.
- How to get there.
- Recent fish stockings.
- A link to buy your angling licence.
- Keep track of your licence information.
- Angler diary to record your fishing trips.
- Anglers Access Program maps.
- Fishing news.
- The Tasmanian Inland Fishing Code.

Free on iOS and Android

EVERY SPARE PART YOU NEED FOR YOUR BOAT TRAILER, ALL IN ONE PLACE.

*Quality parts, spares and accessories for
your Dunbier or McKay boat trailer. From
winches and rollers, to wheels
and tow balls... even full trailer servicing.*

LONG WEEKEND ESCAPES

King Towbars & Trailers:
5 - 9 Florence Street, Moonah (03) 6232 2322
Opening Hours:
8:30am-5pm, Monday - Friday
kingtt.com.au

Infish Angler Diary

*Improve your catch,
and help manage YOUR fishery*

The Angler Diary is part of the Infish App 2.0.

Once you log in your fishing information is there for you anytime.

Record:

- The time and place you fished and methods used.
- The size and number of fish caught.
- Photos of your fish.
- The weather conditions.
- Trends and patterns to improve your catch.

Free on iOS and Android

HELP PROTECT TASMANIA'S WATERWAYS

When visiting or returning to Tasmania, or moving between fishing locations within Tasmania, remember to...

CHECK, CLEAN, DISINFECT & DRY
...your fishing gear

By thoroughly cleaning your fishing gear you can help prevent the introduction and spread of aquatic biosecurity threats, like didymo.

Remembering to Check, Clean, Disinfect and Dry your gear is also an important step towards meeting your general biosecurity duty (GBD) obligations.

Find out more on the website
www.nre.tas.gov.au/biosecurity

SALMON PONDS

HERITAGE HATCHERY AND GARDENS

The first Brown and Rainbow Trout in the southern hemisphere were raised here in 1864. They were the base stock of streams and lakes in Australia and New Zealand.

Visitors can view fish breeding in all its stages, from fingerlings to full-grown trout.

Anglers with an interest in the heritage of their sport will enjoy the museum featuring the history of angling in Tasmania.

Incorporating 'Pancakes by the Ponds'

Pancakes by the Ponds specialise in savoury and sweet, traditional European style crepes. Fully licensed with Tasmanian wines and quality coffee.

Enjoy fine food and refreshments, overlooking the ponds and gardens.

The Salmon Ponds and restaurant are available for special events, weddings, parties, meetings and functions.

\$6.00 concession entry fee for all Full Season Licence holders during the 2024/2025 season

70 Salmon Ponds Road, Plenty. Ph 03 6261 5663
www.salmonponds.com.au

Safe fishing

- Always check water levels
- Keep out of exclusion zones
- Beware of slippery banks, flash flooding, strong currents and turbulent flows, floating debris and submerged objects
- And safely assume the fish they're telling you about are a lot smaller than they say!

hydro.com.au/things-to-do/fishing
